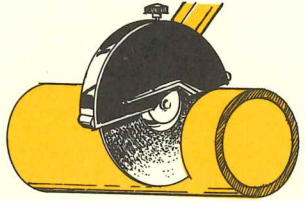
THE MOST IMPORTANT THING THE PARTNER K-12 CUTS IS COSTS

The world's most powerful portable circular saw

Whatever the construction material . . . the rugged PARTNER K-12

CUTS MASONRY PRODUCTS

Concrete and brick, prestressed concrete beams, block, marble, granite, slate, sheet rock, plaster . . . everything!



CUTS PIPE

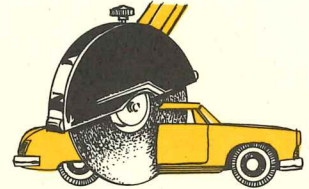
Any type of steel, cast iron, ductile iron, stainless, vitrified tile, transite, asbestos cement. For sheer performance, there is nothing on the market like the K-12.

CUTS WOOD

Exclusive Partner K-12 carbide tip blades are designed to cut through even wood with nails. For all construction work . . . shoring up, tearing down . . . the K-12 gives you more on-the-spot power—saves valuable hours on time and materials jobs.

CUTS ASPHALT

For repairing or replacing any type of asphalt from driveways to roadways, the K-12 does the job with maximum efficiency, minimum effort.



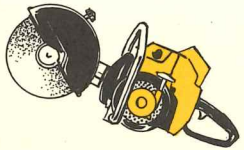
CUTS AUTOMOBILES

Cuts frames, bumpers, quarter panels fast and clean. The most important salvage tool ever devised for auto dismantlers and scrap dealers.

makes quick work of any cutting job

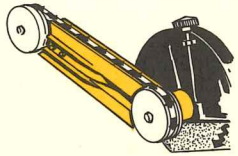
POWERFUL AND PORTABLE

The K-12 Cutting Saw is powered by a heavy-duty 7 HP gasoline engine and features 12 inch, high speed blades that cut 4" in depth. It is a lightweight powerhouse that weighs only 29 pounds.



DESIGNED WITH SAFETY IN MIND

Power is transmitted to the cutting blade through a V belt and centrifugal clutch that slips instantly if the blade jams. This drive system also eliminates "kicking". Every Partner K-12 blade is tested in excess of accepted safety standards.



IMPROVED AIR FILTER AND SEALED IGNITION

A highly improved air filter and sealed magneto now standard equipment on the Partner K-12 — eliminates service problems caused by wear and cutting dust . . . gives the Partner K-12 Cutting Saw even greater operating efficiency.
